M. Abdullah Ali

Software Engineering Student | Flutter & Full-Stack Developer

■ m.abdullahali987@gmail.com | LinkedIn: linkedin.com/in/abdullah-ali-khan987 | GitHub: github.com/mabdullahali987

SKILLS

Flutter & Mobile: Flutter UI, GetX, Riverpod (Beginner), Forms, Image Picker, Screenshot, Share Plus
Backend & Web: Node.js, Express, MongoDB, Mongoose, REST APIs, EJS
Frontend: HTML, CSS, JavaScript, Responsive Design
Other: Git, GitHub, Firebase (Basic), Clean Architecture (Beginner), WordPress

PROJECTS

• Digital Business Card Generator (Flutter): Built a dynamic card generator app using GetX, image picker, screenshot capture, and WhatsApp sharing.

• General Store Management App (Flutter – Ongoing): Manages customer debt, sales, and investments using Riverpod and clean architecture concepts.

• Watch Store Web App (Node.js): E-commerce app with WhatsApp ordering, admin panel, MongoDB database, and image uploads.

• Laboratory Management System (Python): Desktop-based system for patient records, test management, discounts, and invoice generation.

• SRT File Viewer App (Flutter): Loads and displays subtitle (.srt) files with clean UI for learning file handling in Flutter.

• Portfolio Website: Responsive developer portfolio built with HTML, CSS, and JavaScript showcasing projects and skills.

EDUCATION

Bachelor of Software Engineering (Student)
Strong focus on practical development and real-world projects.
